

Service Name

Business Phone Systems

Description

Introducing the next generation of office phone systems... With feature rich, tailored packages to suit any sized business, we are your perfect partner in this exciting new period of communications.

Every customer is given the same level of exceptional service, no matter the size of your company. We aim for the very highest standards in all departments of the solutions we offer. Please feel free to take a good look around our website as im sure you will find some very useful information on traditional phone systems as well as the next generation including VoIP.

Features & Benefits

With a great portfolio of solutions from the biggest names in the telecom's industry, we can sell, supply , install and maintain all the systems we offer. All our staff have been trained to the highest standards set by the manufactures of the solutions we provide. This has taken years of training and exams to achieve, but its all worth it to provide our customers with the best service. We are regularly audited by means of customer satisfaction surveys to maintain these high standards.

Cisco Phone Systems

With solutions for 10 to 10,000+ users, Cisco will have the correct solution for your company. Call Manager, Call Manager Express and the UC500 range are all offered by us.
