Quick Reference Guide

June 2012

Changing your Greeting

Voicemail (cont)

Changing your Daily and Permanent Voicemail Greetings

If you have voicemail enabled you can record two voicemail greetings. The first is a daily greeting that you would normally update on a daily basis, typically giving the date and your whereabouts/availability. The second is a permanent greeting that can be used on any day. If you choose to record a permanent greeting your daily greeting will be deleted at midnight and the permanent greeting will then be used until you record a new daily greeting.

Press the Messages button

Press the context sensitive key alongside the **|Greeting|** icon. Your current Daily Greeting will be played back to you.

You will then be prompted to record your new Daily Greeting. Press hash (#) when finished.

Your new Daily Greeting will be played back to you

If you are happy with your greeting, replace your handset or press the Speaker button, or press the context sensitive key alongside the **|Stop|** icon to save

Repeat the above process to record your Permanent Greeting using the context sensitive key alongside the **|Permanent|** icon.

For further details on all these features and many others, please refer to the PCS 561/562 User Manual

Making an Internal Call

Making an Internal Call

Dial the extension number via the alpha-numeric keypad

Press the context sensitive key alongside the **|Dial|** icon, or lift your handset
